Referral summary

DEMO-PACKET-001 | Not an official IHH document | No real patient data

Purpose

Entirely invented training packet, structured around the supplied IHH referral form and document checklist. Not an official IHH form. No real patient or provider information.

Referring party

Facility: SYNTHETIC TRAINING HOSPITAL. Department: Demonstration discharge planning. Referring staff: DEMO COORDINATOR. Phone, email and nursing station: not supplied; do not contact anyone.

Person / episode

Display identifier: SYNTHETIC PERSON DEMO-PACKET-001. Adult age category. No name, MRN, birth date or government identifier is supplied.

Reason for referral

Invented scenario: short-term recovery after a lower-limb injury. The referring summary describes the person as unhoused and needing a place to recover.

Function reported by referrer

Referral summary states: "Transfers independently and walks 100 feet with a walker." This is the referring summary; compare with the therapy note in this packet.

Medication ability

Self-administration of medications: not documented on this summary. Do not infer ability from the presence of a medication sheet.

Request

Review for recuperative care. No clinical acceptance, insurance approval, available bed or arrival time has been established.

Demographics and coverage request

DEMO-PACKET-001 | Not an official IHH document | No real patient data

Demographic summary

Identifier: SYNTHETIC PERSON DEMO-PACKET-001. Age category: adult. Preferred language: English (invented fixture). Gender and ethnicity: not supplied. Contact details and emergency contact: not supplied.

Housing information

Referring summary reports currently unhoused. Details of prior episodes, duration and available supports are not supplied.

Coverage information

Insurance payer and member number: not supplied. A placeholder request for recuperative-care authorization is included in this training page.

Authorization request status

REQUEST ONLY. No approval letter, authorization number, approved length of stay or payer decision is included. Requested length of stay: not supplied.

Dates

Admission, request and discharge dates: intentionally withheld in this synthetic exercise. There are no hidden dates or identifiers underneath this text.

Staff section

Reviewer: not yet recorded. Referral decision: not yet recorded. Admission and exit dates: not established.

History and progress note

DEMO-PACKET-001 | Not an official IHH document | No real patient data

Synthetic progress note

SYNTHETIC PERSON DEMO-PACKET-001 is recovering from the invented lower-limb injury described in the referral summary. This page is an authored training document, not a clinical note or treatment recommendation.

Current observations

The fictional clinician documents that the person is alert and oriented to person, place, time and situation. The note describes medical condition as stable for discharge planning, subject to completion of functional and care-coordination review.

Daily living activities

Eating is described as independent. Bathing, gathering supplies, toileting and shower transfers have not been assessed in this note. Do not interpret unassessed activities as independent.

Care needs

Wound details, home-health arrangements, oxygen needs, IV access and equipment arrangements are not documented in this note. No conclusion about these needs can be drawn from omission.

Behavioral information

No behavioral assessment or relevant history is provided in this test packet. No background-check result is supplied.

Planning status

Discharge plan is pending functional clarification and coordination. No recuperative-care admission order is included. Note date: intentionally withheld.

Physical therapy functional note

DEMO-PACKET-001 | Not an official IHH document | No real patient data

Source / identification

SYNTHETIC PERSON DEMO-PACKET-001. Authored physical-therapy example. Assessment date: intentionally withheld. This is separate source documentation from the referral summary.

Transfers

Therapy observation: "Sit-to-stand and bed-to-chair transfer required contact-guard assistance from one person." Independent transfer was not demonstrated during this documented session.

Ambulation

Therapy observation: "Walked 80 feet with a walker and contact-guard assistance; stopped for a seated rest." No independent 100-foot walk is documented in this therapy note.

Equipment

Walker used during the observed session. Independent equipment use outside the session is not documented.

Other activities

Bathing, toileting and medication management were not assessed in this therapy session.

Document relationship

The referral summary and this therapy note describe different assistance levels. Their dates are withheld, so chronology cannot be established from this packet. No later reassessment is included.

Medication sheet and nursing note

DEMO-PACKET-001 | Not an official IHH document | No real patient data

Medication sheet

SYNTHETIC PERSON DEMO-PACKET-001. Placeholder medication entry: MOCK MEDICATION A. Actual drug, dose, route and frequency intentionally not supplied. Not a prescription; never administer from this training document.

Medication availability

A 30-day supply has not been documented. Pharmacy, delivery arrangements and medication reconciliation are not supplied.

Nursing observation

The training note states: "Medication was handed to the person during this observation." It does not document independent preparation, schedule management or a self-administration assessment.

Self-administration

Ability to self-administer all medications: unknown from the documents supplied. Insulin use and independent insulin administration are not documented.

Functional observations

No independent transfer, toileting or bathing assessment is recorded on this page. Refer to the separate therapy note for its documented session.

Source dates

Medication-sheet date and nursing-note date are intentionally withheld. No treatment instructions or clinician signature are provided.

Screening and observations

DEMO-PACKET-001 | Not an official IHH document | No real patient data

Screening result

SYNTHETIC PERSON DEMO-PACKET-001. Invented COVID screening result: negative. Specimen collection date/time: [INTENTIONALLY WITHHELD IN SYNTHETIC EXERCISE]. This text does not conceal recoverable source data.

Timing limitation

With the collection and planned admission times absent, the reader cannot establish whether a time-dependent screening requirement has been met. Do not use the PDF creation timestamp as a clinical date.

Other screening

MRSA screening, TB test/chest X-ray, cultures and isolation-clearance documentation are not included. Missing documents do not establish a positive or negative finding.

Observation sheet

Invented observations: temperature 36.8 C; pulse 78/min; respiratory rate 16/min; blood pressure 118/76 mmHg; oxygen saturation 97%. Observation date/time intentionally withheld. These values are fabricated for document testing, not clinical advice.

Packet boundary

End of six-page training packet. No hidden attachments, approval letter, later therapy reassessment or clinical decision is included.

Use restriction

Synthetic testing only. Human review is required; no eligibility, authorization, placement or care decision is established by this packet.
